

# Saveetha Comprehensive Lactation Management Centre (SCLMC) / Human Milk Bank

Department of Neonatology inaugurated the Saveetha Comprehensive lactation Management Centre (SCLMC) /Human Milk Bank On 27<sup>th</sup> JANUARY 2020 which serves as an important service in promoting exclusive breastfeeding for all our neonates the key for appropriate nutrition. Our Saveetha Comprehensive lactation management centre (SCLMC) promotes and supports breastfeeding and provides access to safe donor human milk for those babies who need it. The SCLMC also offers lactation support to all mothers who are delivering in our Hospital. Babies will benefit from this venture. The most important goal of any Comprehensive lactation Management Centre is to conserve the natural act of breastfeeding. SCLMC provides Donor Human Milk (DHM) if mother's own milk is insufficient or not available for any unavoidable reason. Donor milk is the next best alternative to bridge the gap and this would be great help to such mothers and their off-springs.
