HOSPITAL BEDS

The Saveetha Medical hospital symbolizes our commitment to provide the best of facilities, infrastructure, technology and care to our patients – the most important members of our fraternity. We are committed to our mission to "provide the best of evidence based medical care to patients in an ethical and compassionate environment."

A team of more 334 specialists over 40 specialities, ably supported by more than 250 post graduates, 100 Junior Residents, 150 interns, 702 nursing staff, 294 technicians and 187 support staff work together as a team with just one aim - to provide the best of evidence based care to our patients.

SMCH is a teaching hospital with 1250 beds, and the work culture is markedly different from a standalone corporate hospital or a government one. We provide professional freedom to doctors to practice medicine in an ethical and scientific manner. We have senior professors with decades of experience to guide the treatments for each patient. Here in this hospital, you may be rest assured that each investigation has a rationale behind, and each treatment modality is supported by an evidence base. Being a teaching hospital, there are a large number of resident doctors which help us in providing quality care all 24 hours.

We have almost all the clinical specialties in our hospital, and many of our doctors are leading specialists in their disciplines. We have the latest technology and equipment, and the expertise available to provide cutting edge treatment.

SMCH has gained the trust of the community, and is the preferred hospital for thousands of families touched by our care. Over the last 12 years, Saveetha Medical College Hospital has done a yeoman service in providing tertiary health care of highest quality at most affordable costs. We have touched the lives of more than 10 lakh people, each day at Saveetha we see 3000 outpatients, provide inpatient care to 1000 people, manage more than 150 emergencies, and perform 40 major life saving surgeries.
