

SURGICAL AND RESTORATIVE IMPLANTOLOGY

10 RESTORATIVE CHAIRS 6 SURGICAL OPERATING THEATRES

At Saveetha, advanced practices hold prime significance too. Our implant department has 6 Surgical Operating Theatres with undergraduates as well as postgraduates placing over 1500+ implants per year. We have 10 Restorative chairs to train around 17+ graduates for fellowship and masters courses in implantology. An elegant conference room where AV presentation prior to every case is mandatory for the key purpose of interdisciplinary implant diagnosis and treatment planning.

Saveetha Implantology provides implants of top brands in the current market viz. Nobel and Straumann Implants and clinically proven excellent biomaterials for advanced procedures. Post implant placement the restorative phase is done with a complete digital workflow. Our department has the distinction of placing over 7000 implants and we enjoy a cumulative success rate of 97.3%. We have also trained over 300+ qualified Australian dentists to place implants! Hence, it is ours, Saveetha offers the best implant training (period).

All implant placements and restorations are independently done by the graduates. It is not an exaggeration to claim that only here you would get real hands on training.
